This Agreement is in reference to our recent telephonic conversation regarding one Mobile Application development for your business. I would like to inform you that we have understood all your requirement based onto information shared by you

Now, Here by I am sending you the Agreement of the same so please have a look and update with your views so that accordingly we can move ahead to next phase of your project.

### **:: Project Functions: -**

We will be design and develop a complete customized Mobile application designed and developed using flutter, This mobile application allow user to login using user id and password provided by their store owner.

Once a employee is logged in they will be able to manage following things.

1. mark their attendance which will track their time and location of punching the attendance. All this information will be saved in the dashboard of shop owner.
2. Check their shift timing.
3. Check salary.

Shop owner from there admin panel will be able to manage following section: -

1. Add, edit or delete employee <Every shop owner will have limit of number to be added based onto their purchased subscription plan> <While adding a employee shop owner will also add their salary>
2. Manage login and logout time of employee along with time and location
3. Salary calculation <Based onto login and logout time and salary added by shop owner>
4. Shop Owner will create HR Manager for employee < HR will take care of Roaster off from there panel>

Super Admin will be able to manage following section from their panel

1. Manage Application banners < From this section admin will be able to add, edit or delete N number of banners on Application>
2. Manage Subscription plans <From this section admin will be able to add, edit or delete subscription plans and its price>
3. Manage Shop owner account <From this section admin will be able to add, edit or delete n number of shop owner account> <From this section admin can see how many accounts show owner using and how many are left>
4. Manage static pages<From this section admin will be able to manage content and images of all static pages available on application>

**:: Project cost and timeline: -**

Total cost of this project will be : USD 2000 <One time and life time cost>

Project will be completed in just 20 to 25 days once project design is approved by client.

**:: NOTE: -**

1. All 3rd Party services & API will be provided by client like, Payment gateway, SMS gateway, Hosting for database, Google and IOS account etc.
2. Code of this project will be clients property as soon as our balance is paid, our balance will be paid before making the project live under client Domain and Hosting.
3. Along with this project we are offering 1 year of maintenance including this price, any error or bug will be fixed by us between this time without any extra cost, this 1 year of maintenance is valid if no other developer touch our code.
4. After 1 Year client will need to renew the maintenance by paying 25% of total project cost.
